Study ID:IRB202300435²³Date Approved: 4/10/2023

Have you taken opioids?

If you are between 45-85 years old, this study may be for you.

Study for adults ages 45-85 who have taken opioids.

We're looking for adults ages 45-85 who have taken opioids to participate in a research study examining the effects of oxytocin and oxycodone.

The hormone, oxytocin, may interact with opioids, so we want to understand how oxytocin interacts with the drug, oxycodone.

Participants will be asked to participate in:

- 1 Screening Visit (~3 hours)
- 6 Session Visits (~6 hours/session)
 - Includes sensory and psychological assessments
 - Take standard doses of oxycodone and oxytocin

Participants will receive:

- Up to \$630 dispersed throughout study visits
- A standardized breakfast for each session visit
- Free transportation following session visits

Location

 In-person appointments will once per week for 6 weeks at the University of Florida in Gainesville, FL.

Are you eligible?

- 45-85 years old
- Current and/or previous use of opioids
